PROFESSIONAL SUMMARY Full-stack software engineer with hands-on experience building production web applications using React, TypeScript, Node.js, and Prisma. Experienced in REST API development, system design, and cross-functional collaboration. Seeking a developer role to build scalable, real-world systems and contribute to high-quality products.

- WORK EXPERIENCE**
- RaoChatHub - AI Chat Platform | Dev Manager** Jul 2025 - Present
- Led frontend development using React and TypeScript
 - Designed and implemented backend REST APIs with Express.js and Prisma
 - Designed UX/UI flows and frontend architecture
 - Coordinated development tasks and technical decisions within team
 - Defined system architecture, workflows, and relational database schemas
 - Ongoing project
- Siam Denso - Inventory Management System | Dev Engineer** Jun 2025 - Oct 2025
- Designed and developed RESTful APIs using Node.js and Express.js
 - Implemented database access and data modeling with Prisma ORM
 - Integrated APIs across multiple internal system modules
 - Produced technical documentation including Sequence, Class, and ER Diagrams
 - Designed and maintained relational database schemas
- Clicknext -Doc Management System | Developer** Mar 2024 - Nov 2024
(Cooperative Education)
- Developed a Document Management System frontend using React and REST APIs
 - Integrated frontend components with backend services to support core system features
 - Contributed to system architecture design within a team environment

- EDUCATION**
- Bachelor of Science in Software Engineering**
- Burapha University – Faculty of Informatics
 - GPA: 3.90

- TECHNICAL SKILLS**
- Frontend**

 - React, TypeScript, JavaScript (ES6+),Tailwind CSS
 - Component-based architecture
 - REST API integration, responsive UI development
- Backend**

 - Node.js, Express.js
 - Prisma ORM
 - REST API design and implementation
 - Relational database design
- System & Tools Design**

 - UML (Sequence Diagram, Class Diagram)
 - ER Diagram, system workflow design
 - Figma (UX/UI design and prototyping)
- Other**

 - English: Professional working proficiency
 - analytical and problem-solving abilities
 - Experience working on multiple projects in parallel
 - Collaborative team player in software development environments

- ACHIEVEMENTS & INTERESTS**
- Super AI Engineer Season 5 (Track Innovator) : WINNER, presenting an application RaoChatHub at a technical conference
 - Self-studied cybersecurity fundamentals through online courses (ISC2, arit.co.th)
 - Participated in Capture The Flag (CTF) cybersecurity competitions organized by NCSA Thailand
 - Participated in cybersecurity workshops and hands-on security training
 - Actively explore system security concepts alongside software development projects
